DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show a slide (18) as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Claims 1-3, 10, 11, 13, 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Holzapfel, et al. (6,135,499).

Holzapfel discloses a safety belt system comprising a guide 14; a support for a vehicle restraint 10, the support movable along the guide and a securing member 20, the securing member selectively actuatable between a first position interfering with movement of the support through a predetermined point on the guide and a second Holzapfel teaches a control feature for selectively actuating the securing member between the first position and the second position. The control feature comprises a control member 24 having a first condition for maintaining the securing member at the first position and having a second condition for permitting the securing member to move to the second position. The guide comprises a rail. The support comprises a slide, slideably received on the rail.

Allowable Subject Matter

4. Claims 4-9, 12, 15 and 17-19 are would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
